## OBJECTIVE

Motivated and fast-learning React Developer with hands-on experience building applications through internships and personal projects. Skilled in Reactjs and familiar with React concepts like components, hooks, and state management. Seeking an opportunity to apply my skills in a development role within a forward-thinking company, eager to contribute to team success while learning from seasoned professionals.

## PROJECTS

### **ReactPortfolio** ([Click here](#))

Built a visually appealing portfolio with a dynamic user interface using React components, focusing on clean design and intuitive navigation to enhance user experience and deployed the portfolio on platform like GitHub Pages.

### **MovieBAG** ([Click here](#))

Built a fully responsive interface with React, making the movie search app functional and visually appealing on both mobile and desktop devices.

### **Weather app** ([Click here](#))

Designed a clean, user-friendly interface by Integrating a weather API (e.g., OpenWeatherMap) in a React application to fetch real-time weather data, including temperature, humidity, and wind speed, for any location.

### **React form** ([Click here](#))

Developed real-time form validation using state and controlled components with instant feedback to users, dynamically displaying error messages for incorrect input.

### **DataDash**

Developed a fully functional React CRUD application connected to JSON Server, enabling seamless Create, Read, Update, and Delete operations on data.

Styled the app using Material-UI for a clean, modern, and responsive design, improving the overall user experience.
